SUMMARY

Results driven IT professional with hands on experience in Application Administration, IT Support, and Quality Assurance. Proficient in application support, user access management, technical troubleshooting, UAT, defect management, and system monitoring. Demonstrated ability to work effectively with cross-functional teams, troubleshoot complex issues, and support reliable application operations while maintaining a strong focus on quality and continuous improvement.

EXPERIENCE

Application Support Engineer — 02/2026 - Present
Edine Services PVT LTD.

- Performed UAT for functional and non-functional requirements to ensure application quality and performance.
- Managed user accounts, RBAC, permissions, and access provisioning.
- Collaborated with stakeholders, QA teams, and developers to resolve issues and deliver enhancements.
- Investigated, documented, and tracked defects; validated fixes before deployment.
- Monitored application performance and provided first-line incident and user support.
- Coordinated deployments, configuration changes, releases, and post-deployment validation.
- Supported change management, release management, and access governance.
- Troubleshot hardware, software, network, printer, and peripheral issues.
- Installed, configured, and maintained operating systems and business applications.
- Supported user onboarding/offboarding, account setup, and device configuration.
- Resolved technical issues through ticketing systems within SLA requirements.
- Performed system health checks, application monitoring, and routine maintenance.
- Assisted with password resets, account recovery, software installation, and technical support.
- Escalated complex issues to infrastructure and development teams and coordinated resolution.
- Provided end-user guidance and training on applications and IT best practices.

Quality Assurance Engineer - Internship — 06/2025 - 02/2026
Edine Services PVT LTD.

- Performed manual testing for App Ting, a food and liquor delivery platform, ensuring application quality across Customer, Vendor, and Rider mobile applications.
- Designed, developed, and executed comprehensive test cases based on business and functional requirements.
- Identified, documented, tracked, and verified software defects using Azure DevOps Boards.
- Collaborated with Business, Development, and DevOps teams to clarify requirements, resolve issues, and ensure timely delivery of high-quality releases.
- Conducted QA audits to validate application UI against Figma designs, documenting inconsistencies and providing detailed audit reports.
- Executed functional and non-functional testing to verify system performance, usability, reliability, and overall product quality.
- Performed manual testing for the Support Portal and Admin Portal web applications, validating end-to-end business workflows.
- Conducted regression, smoke, and sanity testing before production releases to ensure application stability.
- Validated bug fixes and performed retesting to confirm successful issue resolution prior to deployment.
- Participated in User Acceptance Testing (UAT) and worked closely with stakeholders to ensure business requirements were successfully met.
